

MAPFACT RUCKSACK

WW4

v1.0

28-11-2012

This is a special release of [MapFact's Rucksack](#) that adds ammo from the WW4 v2.5 mod and fixes some bugs that happen in CWA. This addon is based on Mapfact's Rucksack v1.1, so it also contains all the features present on that version.

While initially this addon was created for personal use, BadAss kindly granted permission to make it public. In order to differentiate this version from the regular MapFact releases he asked me to rename it to "WW4" instead of continuing the version numbering (which would make this v1.2). So, this is finally version 1.0 of the WW4 branch.

Please refer to the "Readme_eng.htm" file in the "old v1.1 docs" directory for extended info and instructions about how to use this add-on.

WW4 magazines

As you can see in the table below, all the rucksack magazines use the same class names as the default WW4 ones, but with *MAP_* added as a prefix and *_PDM* as a suffix. These magazines can be carried by any rucksack.

Rucksack Class Name	WW4 Class Name
MAP_WW4_W556_30Bmag_PDM	WW4_W556_30Bmag
MAP_WW4_W556_30BHDmag_PDM	WW4_W556_30BHDmag

Mine East

And for the Mine East magazine:

Rucksack Class Name	Class Name
MAP_MineE_PDM	MineE

CHANGELOG

WW4 v1.0:

- Added support for WW4 ammo
- Dropped magazines are a bit ahead from the player now, so they're clearly visible
- Players can interact with dropped magazines instantly
- CWA: Fixed player being stuck when placing or packing tents and camonets
- Fixed instance where player wasn't able to pack something if he still had loaded (although empty) the thing that he wanted to pack
- Minor corrections to stringtable.csv
- Added Mine East

CREDITS

Original addon: BadAss, Flashpoint_k and raedor (see "Readme_eng.htm" for extended credits)

WW4 version: kenoxite
